

STUDY TEAM

The study team is multidisciplinary, with collaboration between the applicant, sponsors, advisors, and the research staff. For patient enrollment, there are 3-4 research staff that are employed to enroll patients every weekday from 7 AM to 6 PM. The applicant will assist in the enrollment process as time permits to learn by experience the steps required for study implementation. The research staff will also extract ECG signal along with survey data, and store it in a secure system, as described in the “**Data Safety Monitoring Plan**” (section K5). The sponsors will assist with the data analysis and interpretation.
